INSPIRÉ PAR VOUS

During the 90s Le Tone had a major hit, "Joli Dragon", and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

*Figures shown are for comparison purposes only; you should only compare these fuel consumption and CO₂ figures with other cars tested using the same technical standard. The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test WLTP (Worldwide Harmonised Light Vehicles Test Procedure) used to measure fuel consumption and CO₂ figures. The CO₂ figures shown are NEDCeq (New European Driving Cycle Equivalent), calculated using an EC correlation tool which converts WLTP figures to NEDC. These NEDCeq figures are based on the outgoing test cycle and will be used to calculate tax for the first registration. CO₂ and fuel economy figures may vary according to wheel fitment and optional extras fitted.
